

## 20Khz ultrasonic tube sealing equipment

### Introduction of ultrasonic tube sealing equipment

The automatic tube sealing machine uses ultrasonic to fuse the sealing surface of the plastic tube under high pressure, and fuses the high pressure on both sides of the hose mouth, avoiding some defects caused by foreign matter on the pipe wall and sealing is not strong, and sealing clean. This machine can print the date of manufacture, shelf life and other numbers at the tail seal according to customer needs. Applicable scope of the sealing machine: It is suitable for sealing machinery ideal for medicine, daily chemical, food and special industries.

**Parameter:**

Item	Parameter
Frequency	20Khz
Power	1000W
Speed	20Time/min
Dimension	1100x460x850 (mm) 1100x460x450 (mm) without table lags
Weight	86Kg 70Kgwithout table lags

Air pressure time	adjustable
Ultrasonic time	adjustable
Cutting time	adjustable
We have default setting before shipment , the default setting suit for most products, if it can't sealing your tube, you can sealing yourself
